Project Objective

Problem Statement: To design an interactive, multi-page Power BI dashboard that enables analysis of global sales performance across continents, evaluates trends in profit, quantity sold, and highlights top-performing regions and underperforming areas and to compare regional sales, profits, and growth over time using map-based and trend visualizations. The goal is to aid strategic business decisions through geographic and temporal data visualization.

Original Dataset : 5961 records (5961,21)
Source: Open Source
CSV format dataset of global sales data from
the year of 2018 to 2024 (Order ID, Order
Date, Ship Date, Region, Sales,...).
Colab Notebook for data cleaning ,
preprocessing and basic EDA with python.
Power BI as visualization tool

- **Initial Dataset Shape: 5916 (with duplicates and errors)**
- **Missing Value Handling: Dropped rows with missing/invalid critical fields (Order Date, Ship Date, etc.)**
- **Numeric Conversion: Sales, Profit, Unit Price converted to float**
- **Duplicates: Removed 10 duplicate rows**
- **Text Standardization: Corrected typos and cases in categorical columns**
- **Column Dropping: Dropped not so important attributes.**
- **Final Shape After Cleaning: 5901 records**

- **Top 5 Countries by Sales: Brazil, India, Canada, Germany, Australia**
- **Category Sales Share: Office Supplies > Technology > Furniture**
- **Some countries (highlighted in red) show profits, indicating potential operational inefficiencies.**
- **Sales peaked in 2019, followed by a dip and resurgence.**
- **Map chart (with continent grouping) indicates Europe and Asia as strong continents in sales volume.**
- **Top segments: Consumer > Corporate > Home Office**
- **Standard Class is the most used shipping mode, but with moderate delivery performance.**
- **Average Delivery Time is impacted by ship mode and region.**
- **Monthly trend analysis shows seasonal fluctuations with spikes in Q2 and Q4.**
- **Top products belong to Office Supplies and Technology categories.**

Conclusion

The four-page dashboard created in Power BI, powered by robust EDA and a clean dataset, allows for dynamic exploration of global sales data. It provides actionable insights into product, regional, and shipping performance. This project satisfies the requirement, combining both visual analytics and business intelligence for decision-making.
